ECO-FRIENDLY PACKAGING SOLUTIONS

Catalog

We continuously develop more fabrics made of different environmentally friendly materials, and provide personalized logo-services for each customer to meet their needs for different styles of bags.

Efficient production capacity and strict quality inspection will lead the market with professionalism and setting a higher industry benchmark. After 20 years of intensive cultivation, it is far ahead of the market in quality, safety and environmental protection, which can provide satisfactory non woven fabric industry chain solutions for differentiated needs.

Non woven
shopping bags

Organic cotton shopping bags

Organic cotton is a natural fiber grown without pesticides, chemical fertilizers, or GMOs. Its main characteristics include greater environmental sustainability, as it reduces soil and water pollution. It is cultivated using natural methods that preserve the soil.

Organic cotton is also known for its softness, durability, and breathability, and it has the same quality as conventional cotton.

Cotton shopping bags

Cotton bags are a valid alternative to single-use plastic bags, significantly contributing to waste reduction.

Choosing cotton bags helps promote responsible and sustainable consumption, supporting environmental protection and reducing pollution.

GUARANTEE OF SAFETY AND SUSTAINABILITY

The OEKO-TEX® Standard 100 certification represents a commitment to quality and safety in textile products, ensuring they are made without the use of hazardous substances.

The main goal is to guarantee that products are safe for direct skin contact, reducing health and environmental risks. Products certified with this standard are therefore considered safe and compliant with environmental and safety regulations.

All our cotton bags are OEKO-TEX® Standard 100 certified.
